

Serenity²

Online commerce opens up new markets and offers you an international showcase. There is no easier way for your customers to purchase your products or services, comfortably seated behind their desk or from their living room. What you need is a guarantee that their payments will reach you quickly and smoothly. With Ogone e-Commerce, nothing could be simpler!

Ogone e-Commerce is a payment button that you can add to your site in only a few minutes and that allows you to accept a broad range of payment methods, the same methods of payment that your customers use every day.

Once they have clicked on the button, your customers are redirected to the Ogone site, which collects their financial data in total security. These data are then processed by Ogone, before the results of the transaction are returned to you in real time. You can then start dispatching your goods or authorise your customers to download your products. Your bank then credits you with the amount of the transaction.

Why choose Ogone e-Commerce ?

First of all, because you can integrate Ogone e-Commerce in no time. All it is, in fact, is a button that you add to your purchase validation page and a link that is associated to this button. The second good reason is that you can take advantage of the high level of security offered by Ogone, without the headache of the technical complexity. You do not need to obtain a SSL certificate, as you benefit from the Ogone certifications, which have already been acquired and which are constantly updated to ensure an optimal level of security for you and your customers.

Ogone e-Commerce, in three steps

To accept payments from your customers quickly, all you need to do is follow the following three steps :

1. You create your free test account on www.ogone.com. You immediately have access to all of the Ogone e-Commerce technical documentation and you can test the possibilities of your payment solution.
2. At the same time, you ask an Acquirer, i.e. a bank that authorises you to accept payments, to grant you a contract for the methods of payment that you wish to accept.
3. Once your contract has been signed with the Acquirer of your choice, you convert your Ogone test account into a production account and you choose the subscription package that best suits your needs.

As soon as you have completed this last step, you are ready to reap the awards of your on-line Commerce.

And there's more...

To make life easier for you and for your customers, Ogone provides you with a whole series of tools that will allow you to monitor your transactions and your sales in real time. You can thus search for the payments made by your customers in an archive, consult their status, extract reports or modify the configuration of your Ogone account.
